STAGS

Segment Generator

RRP £289

Wholesale £160

BLACK

WHITE

Stags is a six-segment generator that can be patched into whatever the moment demands: a complex multi-stage envelope, six individual envelopes, sequencers, LFOs, sample and holds, slew limiters and more. The module detects which gate inputs are patched and groups its segments to match, so the layout is set by your cables rather than menus. Full-length sliders keep every segment hands-on.

FEATURES

— Six segments with Ramp, Hold and Step types
— Patch-defined grouping: one 6-stage envelope, 6 single envelopes, 3+3, 2+4 and more
— Per-segment looping for LFOs and sustaining envelopes
— Segment durations from 1ms to 16s
— CV output 0V to +8V, down to -8V from modulated Hold and Step segments
— Up to six modules can be chained via rear connector
— Based on open-source Mutable Instruments Stages firmware
— FR4 fibreglass panel

SPECIFICATIONS

SKU	EUR-STA-BLA (Black) · EUR-STA-WHI (White)
Format	Eurorack
Width	14HP
Depth	25mm
+12V Current	80mA
-12V Current	20mA

STOCKING & AVAILABILITY

Factory assembled PCB & SMT, THT hand finished and calibrated in Edinburgh, Scotland. Brand New. Ships tracked and insured within 1 business day. Enquiries: **eastcoastmodular.co.uk**
